

Chris LaCaille

Front-End Developer

OBJECTIVE

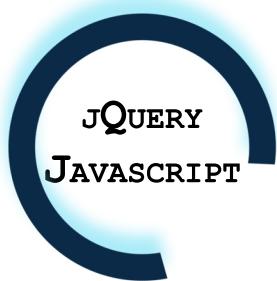

Self-taught developer seeking Front End Developer position at a reputable company to develop quality products and continuously learn and grow as a team member while leaving a lasting impact on customers and colleagues alike.

ABOUT

Talented and passionate web designer and developer looking to work with like-minded and creative individuals who share my passion for web creation.

I pride myself in being reliable, possessing a strong work ethic and proficient in a wide range of web technologies that I can implement to be more efficient and increase workflow. I sincerely enjoy taking a complex problem and turning it into something intriguing and engaging.

TECHNICAL SKILLS

EXPERIENCE

Lead Developer (03/2016 - current) Deaf And HoH (non-profit) - I am currently converting the deafandhoh static site to a dynamic WordPress site. This internship has given me experience with the inner-workings of WordPress through creating custom template pages/posts with PHP.

Senthil Srinivasan: senthil@deafandhoh.com - test.centralconcretecreations.com/wp/

Lead Developer/Designer (11/2015 - 01/2016) Central Concrete Creations - CCCreations is a concrete contractor who wanted a simple page so I took it on as my first client project with the popular framework Bootstrap. centralconcretecreations.com

OnePASS - Password manager app - This app helps you generate and store strong and unique passwords all in one place. Built with jQuery, Javascript, and Bootstrap. chrislacaille.com/onepass

Source Weather - Weather App - This is a simple app that finds local weather through geolocation or your IP depending on browser security. Built for FreeCodeCamp with jQuery and JavaScript primarily. chrislacaille.com/source

Cool Connect - Messenger App - This app was built for personal use to send the same message to SMS and email at the same time using JavaScript and PHP. chrislacaille.com/connect

Currently completing new portfolio page:
